

Bhuva Het

Rajkot, Gujarat, India | 7016634376 | hetp5852@gmail.com [LinkedIn](#) | [GitHub](#)

Summary

AI/ML and full stack developer focused on working with data and building practical AI features. Interested in applying machine learning to real-world problems.

Technical Skills

Languages: Python, Java, TypeScript, JavaScript, SQL, NoSQL

ML & CV: scikit-learn, PyTorch, torchvision, OpenCV, NumPy, pandas, SciPy

Full-Stack Tech: NextJs, React, Postgree, Auth handling, Express

Frameworks: FastAPI, Flask, Streamlit, Next.js

LLM APIs: OpenAI API, Anthropic API, Gemini API

Techniques: Feature engineering, clustering, similarity search, model serving, prompt workflows

Workflow: Provider fallback, retry/timeout handling, concurrent generation, response schema shaping

Tools: Docker, Git, GitHub, Linux

Selected AI/ML Projects

Doc Analysis

Python, NextJs, Langchain, vector-db, embeddings

[GitHub](#)

- Built an AI-powered document analysis system using **Python, LangChain, vector embeddings, and a vector database**
- Implemented a **Retrieval-Augmented Generation (RAG)** pipeline to enable context-aware question answering over documents
- Generated and stored **vector embeddings** for efficient semantic search and retrieval
- Validated detected patterns using Random Forest, SVM, and Isolation Forest models
- Designed backend pipelines for **document ingestion, chunking, and preprocessing**
- Developed a **Next.js frontend** for seamless document upload and interactive chat-based querying

Cardiovascular Disease Detector Backend

Python, scikit-learn, FastAPI,

[GitHub](#)

- Trained Random Forest model with engineered features including BMI, age-group, BP category, and pulse pressure
- Exposed prediction endpoint with probability output and risk-level mapping
- Implemented health/model-info endpoints for runtime checks and model metadata visibility

Selected Full stack Projects

Expense Tracker (StacksUp)

[GitHub](#)

- Built a full-stack Expense Manager web application using **Next.js** for the frontend and **PostgreSQL** for structured data storage, enabling users to track daily income and expenses efficiently.
- Implemented secure **user authentication and authorization**, allowing personalized dashboards and protected access to financial records.
- Designed and optimized **PostgreSQL database schemas** for expense categories, transactions, and user data

with efficient CRUD operations.

- Integrated **AI-powered expense summarization** to generate smart spending insights, monthly summaries, and budget recommendations based on user transaction history.
- Developed responsive and user-friendly UI with Next.js, improving accessibility across desktop and mobile devices.
- Managed full project lifecycle including GitHub version control, deployment, and feature enhancements in an agile development workflow.
- Enhanced application performance through optimized API calls, server-side rendering, and scalable backend architecture.

Side project :

ML simulation

[GitHub](#)

- Developed **ML Simulations**, an interactive educational platform to visualize Machine Learning algorithms in real-time, helping users build intuitive understanding of core ML concepts.
- Built the frontend using **Next.js 16 (App Router)** and **TypeScript**, delivering a scalable, high-performance, and SEO-optimized web application.
- Designed responsive and modern UI using **Tailwind CSS 4**, **shadcn/ui**, and advanced animations with **Framer Motion** for an engaging learning experience.
- Implemented real-time simulations for algorithms including **Linear Regression, Polynomial Regression, Logistic Regression, Gradient Descent, SVR, and Kernel Methods**.
- Built dynamic educational content pages featuring articles, parameter tables, callout boxes, and direct simulation linking for seamless navigation.
- Enhanced user experience with smooth scrolling using **Lenis**, modern icon systems (**Lucide React, Hugeicons**), and polished UI interactions.

Education

Bachelor of Technology — Computer Science and Engineering

Darshan University, Rajkot, Gujarat

Expected May 2027

CGPA: 8.18/10

Higher Secondary Education

Shakti School, Rajkot
